FRONT END DEVELOPER

- Hello there, I'm Mostafa Ahmed, junior front-end developer. I am studying at the College of Law [ASU].
I'm looking for an opportunity as a front-end developer to learn and explore more in this field,
I've studied the basics of programming and track front-end Next.js and design systems, optimization.

SOFTWARE SKILLS

Languages: HTML, CSS, JavaScript, Sass, Pug.js, TypeScript.
Libraries: React.js.
Frameworks: Next.js, Bootstrap, Tailwind CSS, Chakra UI, Shadcn UI.
Others: C, PHP, Python, Starpi, Prisma, Mongo DB, Gulp.js.
Tools: GitHub, VS Code, Figma, Canva, Command Line.

PERSONAL PROJECTS

Fullstack todo app [NEXT.JS | Prima]
This is a FULLSTACK todo app project using Next js, TypeScript, Shadcn ui, Tailwind CSS, Prisma, MongoDB, Clerk, and ZOD, Highly optimized.

Fullstack ecommerce app [REACT.JS | Strapi]
The e-commerce client repository hosts the client-side codebase for a modern e-commerce platform developed using ReactJS, Redux Toolkit, TypeScript, Chakra UI, and React Query. This repository is the front-end interface for users interacting with the e-commerce platform, Highly optimized and responsive.

Fullstack todo app [REACT.JS | Strapi]
This GitHub repository hosts a Todo project developed using TypeScript, ReactJS, Tailwind CSS, and Strapi for the backend, which is Highly optimized and responsive.

Movies app [REACT.JS]
This project is a comprehensive guide and implementation of a movie browsing application built with React.js and Sass.
